

HOP BROOK FLOOD CONTROL REMEDIATION NORTHBOROUGH, MA

About the Project

The 191-acre Hop Brook Flood Control Area is vacant land operated by the Massachusetts Department of Conservation & Recreation as a flood storage facility within the southwestern portion of Northborough. A 9± acre portion of the site was historically used as an auto salvage yard and dumping of materials, resulting in contamination within the soil and groundwater. The project proposes to remove debris and contaminated soil/sediment between 0-5 feet below the surface within six (6) areas identified in the 9± acre site. Contaminated soil/sediment removal will occur within forested uplands (41,500± square feet) and wetlands (33,000± square feet), temporarily stockpiled on-site, and disposed of off-site. Following removal of contaminated soil/sediment, upland and wetland remediation areas will be lined with permeable geotextile, backfilled with clean soil, replanted, seeded, and restored.

Public input is welcomed through attendance at an Informational Session and/or reaching out directly to our project team.

Informational Session

DATE: July 11, 2023

TIME: 4:00 pm – 8:00 pm

LOCATION:

Northborough Free Library
Conference Room
34 Main Street
Northborough, MA 01532

NOTE: Overflow parking is available in the town lot at the Pierce Street/Hudson Street intersection
